

## Dwarf planet song

Let's have a talk, Pluto. We know you've been feeling blue  
They changed your class, so you go blame it on the IAU  
Now you're a dwarf planet, and you're not thrilled, it's plain to see  
But if you look at what makes a planet great  
The dwarves have two out of three:

- 1 You orbit a star, and your star is called the sun
  - 2 You have enough gravity to make you round, but you're missing one:
  - 3 Do you clear your surroundings?
- Dwarf planets don't clear their neighborhood  
They don't have enough mass, but join the class  
If you don't know their names, you should

Ceres  
Makemake  
Haumea  
Eris  
Pluto

I'm Ceres. I'm dark, but I have bright spots  
I'm the biggest in the asteroid belt, and I've got  
9-hour days. If you sleep, you missed 'em  
I'm the only dwarf in the inner solar system

I'm Makemake and I take my time orbiting the sun  
More than 300 earth years for me is just one  
You can tell who I am by my reddish-brown hue  
They used to call me Easterbunny  
Look it up. It's true

I'm Haumea, and they argued over who really found me

I've got two moons and a ring around me  
My shape is warped because I spin so fast  
In a four-hour blaze, my days go past

I'm Eris, and there is no stranger orbit than this, 'cuz we  
Bend the rules where I'm at in the Scattered Disc  
I've been hearing some confusion in the past:  
Pluto may be bigger, but I got more mass

And I'm Pluto!  
To the eight planets I say "Farewell"  
I've got 5 moons, and one's so large, that I orbit it as well  
I enjoy my days of blue skies and red snow  
But I send my love with my Tombaugh Regio

And as astronomers keep up their studies  
They might find our other dwarf planet buddies  
There could hundreds more in our system alone  
For now they remain unknown  
...except for

Ceres  
Makemake  
Haumea  
Eris  
Pluto

Ceres  
Makemake  
Haumea  
Eris  
Pluto
