

H_2O is water
That's what it's made of
When 2 hydrogens and 1 oxygen
Become the best of friends
They make water
(H_2O , H_2O , etc.)

H_2O is awesome
 H_2O is wet
 H_2O in lakes and ponds
 H_2O is the best

It's like a hydrogen sandwich
With an oxygen center
I really like my PB&J
But H_2O is even better

H₂O is water
That's what it's made of
When 2 hydrogens and 1 oxygen
Become the best of friends
They make water
(H₂O, H₂O, etc.)

H₂O is liquid
When it's at room temp
H₂O, I drink it every day
H₂O is the best

H₂O is bent and not straightened
It's the way that it bonds that forms it and shapes it
The bonds are strong; it's hard to break it
The hydrogen and oxygen's bonds are covalent

H₂O is water
That's what it's made of
When 2 hydrogens and 1 oxygen
Become the best of friends
They make water
(H₂O, H₂O, etc.)
